

UNIQUE SURFACE OPTIONS YOU'LL LOVE

What makes a kitchen truly inviting? What makes a bathroom feel luxurious? Unique countertop surfaces in granite, quartz, stone, or laminate add that special finishing touch. Aspen Countertops has more than 17 years as a full-service countertop manufacturer and installer based in Salt Lake City, Utah, with more than 25,000 projects under our belt. We will help you choose the perfect design, style, and materials to accent any kitchen, bathroom, or bar in your home and create a finished look you'll love.

THE PROFESSIONAL SOURCE FOR QUARTZ, GRANITE & SOLID-SURFACE COUNTERTOPS

Working closely with individuals, homebuilders, and construction companies, Aspen Countertops fabricates beautiful countertops in-house from granite, quartz, and a variety of solid surfaces and laminates. That means that we accurately and honestly help you find the material that will best fit the design, function, and price you are looking for. Your countertop choices include:

GRANITE

We start with the highest grade-A stone quarried from around the world, then our highly skilled craftsmen cut and polish it in our workshop. Choose your favorite combination of color and pattern from more than 120 different types of granite.

QUARTZ

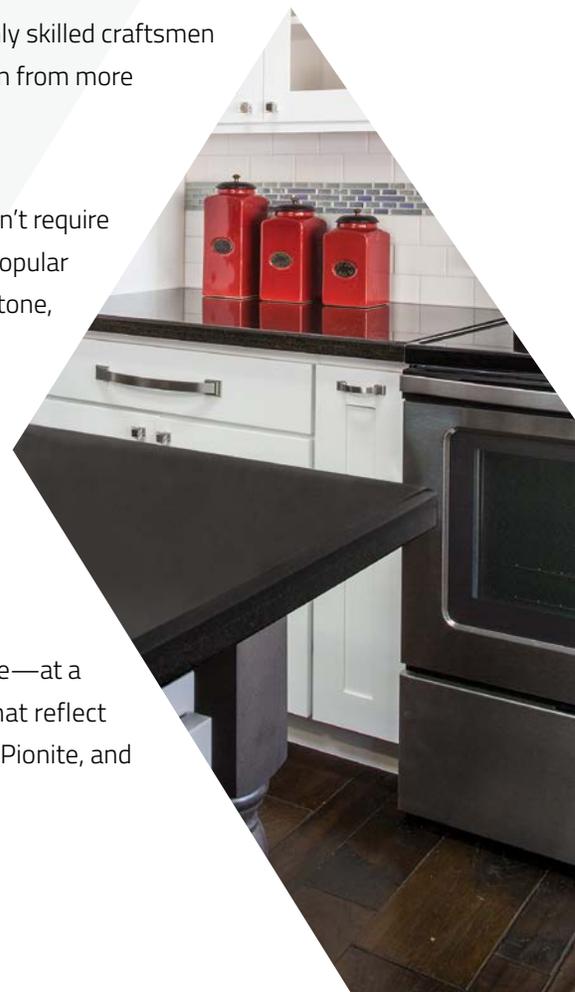

Contemporary looking quartz is more durable than other countertop materials and doesn't require periodic sealing. Featuring bold, monochromatic color schemes, quartz has become a popular choice for high-end décor. We work with Zodiaq, CaesarStone, HanStone, Viatera, Silestone, Cambria, and Radianz.

SOLID SURFACE

These unique surfaces are non-porous so they're naturally stain and bacteria resistant, which makes them perfect for home, medical offices, retail counters, convenience stores, and more. Choose from Corian, Staron, Avonite, Hanex, HI-MACS, and Gibraltar.

LAMINATE

Laminates can be formed to look like other surfaces—from wood grain to natural stone—at a significant savings. They can be easily mixed and matched to create different looks that reflect your home's personality. Our laminate products include Formica, WilsonArt, NevaMar, Pionite, and Abet Laminati.

ECO-FRIENDLY

These countertops made from recycled glass, paper, cement, and other materials that contribute toward LEED certification. Our favorite eco-friendly options include Zodiaq Terra, Eco by Cosentino, Vetrazza, IceStone and PaperStone.

ACCESSORIES

At Aspen, we have the accessories you need to put the finishing touches on your job: stainless steel and quartz undermount sinks, corbels, backsplashes, and vital supplies like GranGuard Daily Cleanser/Sealer.
